DOMETIC MO9722 TWO BURNER STOVE WITH SINK

Dometic's new and improved gas stove and sink combination unit has been purpose built to make cooking in an RV easier than ever. This is the ideal solution for when space is at a premium, offering both your heat source for cooking and a sink for cleaning up all in one compact unit. While the gas stove is small, the burners have been built with improved efficiency to deliver a high combined heat output of 10.5 MJ/h.

The clever push-button 12 V ignition makes lighting the burners quick and easy – you don't even need a lighter or a match. Gas safety valves are fitted to each burner, along with fixed burners to eliminate rattle when on the road. The smart design of the heat-resistant safety glass lid not only protects the cooktop when it's not in use, but also provides more workspace which is often needed in RV kitchens. The stainless-steel finish and detachable trivets make the unit easy to wipe down and keep clean. The Dometic Two Burner Combi Unit will allow you to cook up delicious hot meals wherever your adventure takes you.

PRODUCT DESCRIPTION

A two burner gas stove and sink combination unit for RVs. It comes complete with durable safety glass lids that simultaneously provide protection and extra workspace when the unit is not in use.

SIZE AND WEIGHT

Width 760 mm
Height 178 mm
Depth 325 mm
Net weight 6 kg

WARRANTY

3 Years

OPTIONAL EXTRAS

DM-WT02 Tap

1. High temperatures

New more efficient burners provide high heat output.

2. Easy cleaning

Stainless-steel finish and detachable trivets make cleaning easy.

3. Temperature control

Adjust the temperature easily with the modern duo-coloured knobs.

4. Dual purpose lid

Handy safety glass lid that doubles as extra workspace when closed.

5. Low profile design

Low profile bench top with rubber seal.

6. Shallow depth

The shallow depth allows more space around the unit and can fit a broader range of cabinetry.
