Installation step 1: Applying sealant to the contact surfaces of the hatch door and the wall

Applying sealant

25+

W+3
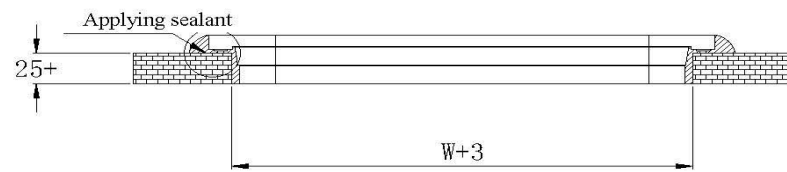

Installation step 2: Installing the hatch door

PA-4X20

Usage

Opening the door upwards

Turning to the right

Opening the door downwards
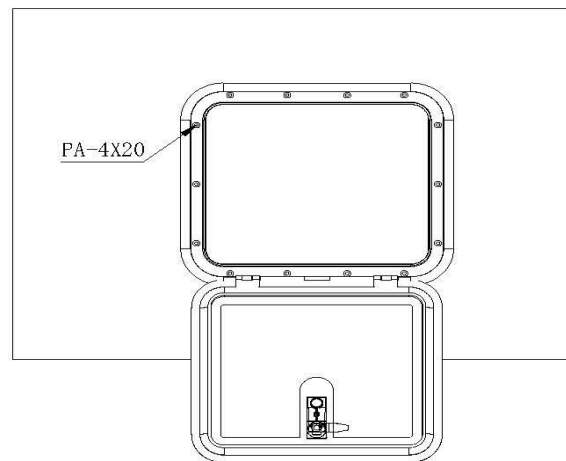

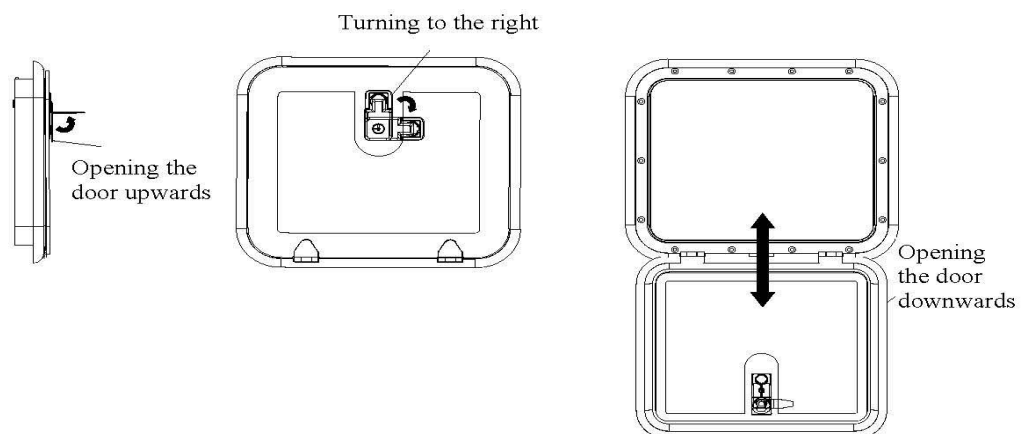

Plastic Hatch Door Installation and Operational Instructions

1. Read the installation instructions carefully before installation. Improper installation may cause physical injury or property loss.

2. Before making the cutout in the car wall, check that there are no wires or other obstacles within the area for the cutout.

3. Before installing the product, please check that the cut-out size matches the product size.

4. Before installing the plastic hatch door, please check that there are no sharp edges, obvious pits, bumps and other defects around the cutout and near the installation area.

5. When assembling the plastic hatch door, please do apply enough sealant to the glue slot of the outer frame to prevent water leakage.

6. If there is any problem with the hatch door, please contact the dealer.
